

Declaration of Conformity – Persistent Organic Pollutants (POPs)

POPs, Persistent organic pollutants, such as pesticides and some industry chemicals, which can be transported across international boundaries far from their sources and persist in the environment, bioaccumulate through the food web, pose a risk to human health and the environment. The continuous release of POPs into the environment have been seriously concerned by European Union since Regulation (EC) No 850/2004 of the European Parliament and of the Council on POPs entered into force in 2004. After amended several times and for further amendments, the POPs regulation was recast into Regulation (EU) 2019/1021 of the European Parliament and of the Council in 2019.

Riedel Communication Canada Inc, as a supplier of electronic products and systems, has been aware of the responsibilities for protecting the environment and human health. We are tracking the update of prohibited substances and restricted substances listed in the POPs Regulation and verify the presence of any substance in our products.

Based on the information we verified, we announce, to our best knowledge, our products are in compliance with the POPs Regulation and don't contain substances subject to prohibitions listed in Annex I to Regulation (EU) 2019/1021. We continue to follow up the update of the POPs regulation and ensure the conformity of our products.

Date: April 17, 2023
